But his new book, 100 Excel VBA Simulations, perfectly hits the mark. Each of the 100 examples is presented in a concise and strait forward way on two pages of the book. One one page he explains the simulation, provides illustrations of how it works, and offers a very insightful "what you need to know" section where he explains the theory and nuances of each.

## **100 Excel Simulations - MrExcel Products - MrExcel Publishing**

Using VBA to do 100,000 iterations took about 230 seconds I Deleted all the other sheets to speed it up in both cases. Excel easily handles 100,000+ iterations on modestly complex models with ease. I try and use the native functions of Excel as opposed to VBA as much as possible, they are just so much faster.
