ADDITIONAL PRACTICE AND PROBLEM SOLVING Answers

Answers to Additional Practice Problems for Probability 1. A i) Since John is grabbing two arm floats, he could grab 0, 1 or 2 arm floats that will hold air. Note: John is grabbing 2 arm floats (multiple trials) and not replacing them (dependent trials). $P(\text{zero good arm floats}) = P(\text{bad arm float} \& \text{ bad arm float}) = (2/8) (1/7) = 2/56$
