Female spiders produce either one egg sac containing several to a thousand eggs or several egg sacs each with successively fewer eggs. Females of many species die after producing the last egg sac. Others provide care for the young for some period of time; these females live one or, at most, two years.

weeks to several months, even years, depending on the method of processing. Through the process, the yolk becomes a dark green to grey color, with a creamy consistency and strong flavor due

Century egg - Wikipedia

Long story short, century eggs are preserved eggs. They are also referred to as

Get Free Take A Thousand Eggs Or More

thousand-year eggs or millennium eggs, but are not preserved for a millennium, one thousand years, or even a century. The process actually takes anywhere from a few weeks to a few months, and involves soaking eggs in a saline solution.

Century Eggs: What Are They, Anyway? | HuffPost Life

The amazing process

Get Free Take A Thousand Eggs Or More

begins with the female digging a hole in the gravel with her tail. A female salmon will lay a few thousand eggs in the hole that will be fertilized by the male fish. Eventually the new baby salmon hatch out of these eggs.

Store the eggs in a cool place (NOT the fridge) and turn them once a day to keep the yolks centred. **A note on shipped eggs: shipped eggs should be allowed to rest for 24 hours prior to setting, to allow the contents of the eggs to settle. Place shipped eggs upright, with the fat end of the egg up, in an egg carton, or something similar.
