The five laws of library science is a theory that S. R. Ranganathan proposed in 1932, detailing the principles of operating a library system. Many librarians from around the world accept the laws as the foundations of their philosophy.. These laws are: Books are for use. Every reader his or her book. Every book its reader. Save the time of the reader.

Five laws of library science - Wikipedia

The foundation of modern librarianship rests on an essential set of core values that define, inform, and guide our professional practice. These values reflect the history and ongoing development of the profession and have been advanced, expanded, and refined by numerous policy statements of the American Library Association. Among these are: access, confidentiality/privacy, democracy, diversity ...
