compelling environmental issues of today and tomorrow are those concerning the world's fresh water resources. Peter H. Gleick's important new volume, *Water in Crisis*, addresses the timely and sometimes controversial aspects of world water use. At stake are water quality, quantity, and possible future conflicts over shared international water resources.

It seems that 2020 is the year of the world crisis. First, it was Iran-USA conflict, then it was deadly Coronavirus (COVID-19) pandemic, then global recession, and now a new crisis looming over the world is WATER CRISIS. In fact, the water crisis is not something new. It is only it is getting severe with every passing day.
